Archish,

In this case, it is better to inform the client that we can manage upto two implementations at this price(1.75 Lacs) and not four.

Hi Sir,

I have spoken to this client but her budget can go maximum upto 1.75 lakh. She needs implementation of all four objectives with data sets and explanation to her and writing.

Do we have any alternative solution or is it not possible?

Best Regards

Archish

Archish,

1.75 Lacs is not possible. You can ask the client that you can try for a 10% discount at max and that is subject to whether you get the approval or not. If the client says, yes try for it, then we will discuss.

Sir, the client has a budget of 1.5 lakhs and can go upto 1.75 lakhs (at max.).

Please let me know if we can do something with-in client's budget.

Best Regards

Noted Sir, thanks. Just wanted to confirm that the above quote would come under which plan (Standard, professional or scientific), so that the client is clear about the revision period and other things.

Hi Sir,

A Client needs assistance in implementation of her research work. Her topic is **Performance analysis of machine learning algorithms for WDM high speed optical networks**.

As per the technical discussion done, Vaishnavi has suggested a total of 4 MATLAB implementations to cover 4 objectives shared by the client. Please find attached for details and let me know the quote.

Best Regards
